Foreword

This publication is one of a monthly series containing data on medical assistance payments made under Title XIX of the Social Security Act (Medicaid). Information is compiled and reported by each State and/or jurisdictional agency administering an approved Title XIX program on Federal Report Form SRS-NCSS-120: Monthly Statistical Report on Medical Care. Currently there are 54 such programs in 49 States, the District of Columbia, Guam, Puerto Rico and the Virgin Islands. Arizona has not initiated a Title XIX program and Massachusetts has a separate State agency for blind recipients.

Prior to January 1974, similar data were collected for the midmonth of each quarter and midmonth quarterly reports have been published in this series since May 1967.

Reports for the months of March, June and September will include quarterly summary data and in addition, reports for December will include annual summary data.

Information presented include medical payments by form of payment, payments to medical vendors by type of service, number of recipients in whose behalf medical vendor payments were made, and data related to screening services under the Early and Periodic Screening, Diagnosis and Treatment Program.

This report was prepared by Henrietta Duvall and Annie J. Mayfield, with the assistance of Robert Terrell, National Center for Social Statistics.

Introduction

Medicaid (Title XIX of the Social Security Act) is an assistance program designed to provide medical assistance to specified groups of needy individuals. Such persons are classified into two main groups according to their maintenance assistance status, (1) those who are authorized to receive money payments for their basic necessities under public assistance programs such as Supplemental Security Income and Aid to Families with Dependent Children, and (2) those who are not receiving maintenance assistance payments even though they may, in fact, be eligible. There are extensions of the maintenance assistance status categories but uniform procedures do not exist for reporting such data. There are four basic eligibility requirements for medical assistance: (1) age 65 and over; (2) blindness; (3) permanent and total disability; and (4) membership in families with dependent children. In addition, some States have exercised the option of including other needy persons who do not fall into any of the above categories. Such recipients are classified as 'Other title XIX' recipients in the accompanying tables. Also, 'essential persons' (usually spouses) may also be eligible for medical care. For money payment recipients, these persons are usually classified according to the same eligibility factors as the recipient spouse.

Generally, payments are made out of Medicaid funds to vendors (providers) of medical services, directly or through a fiscal agent as the direct results of claims filed by the provider after services are rendered. Data presented in this publication are generated as an adjunct to the Medicaid claims processing and payment operation. Thus, information is based on bills paid and not services rendered during the month. Consequently, the data provided through this process are not professed to represent a true picture of the incidence of illness among Medicaid eligibles and are subject to fluctuations unrelated to the provision of medical care. Monthly data are collected and presented to meet pressing current demands for minimum information on medical care financed under title XIX. However, States are required to provide more significant and detailed annual data on the numbers of persons receiving medical services, the number of units of such services and the corresponding amounts of payments.

Except for payments, data related to screening services are not necessarily generated through the claims payment process. Numbers of individuals screened are usually based on services actually rendered during the report month. As a result, payments reported for screening services may be unrelated to persons receiving such services.

HIGHLIGHTS

Medical Assistance (Medicaid) Financed Under Title XIX of the Social Security Act - May 1975

Payments made out of Title XIX funds for May totalled 1.137 billion dollars, a decrease of $41 million from the record high for April. Average monthly payments of $1.033 billion for the year ending in May were 1.3 percent higher than the monthly average for the year ending in April. May represented the second straight month of decline in the rate of increase in average monthly payments.

An estimated 8.7 million recipients 1/ had medical vendor payments totalling 1.104 billion dollars made in their behalf. The May caseload decreased from April and dropped below 9 million recipients for the first time since February.

There were concurrently 358,268 persons enrolled in Health Maintenance Organizations whose premiums were paid out of Title XIX funds. Title XIX per capita payments into the SSA system for aged and disabled persons totalled $23 million.

Persons Served

The percentage distribution of persons for whom medical payments were made by basis of eligibility and money payment status for May is as follows:

Basis of eligibility	Percent	Money Payment Status	
		Money payment authorized	Money payment not authorized
Total	100.0	76.7	23.3
Age 65 and over	22.9	14.6	8.3
Blindness	0.5	0.4	0.1
Permanently and totally disabled	13.7	10.6	3.0
Children under 21 in families	34.6	31.2	3.5
Adults in families with dependent children	21.4	19.9	1.5
Other title XIX under 21	3.2	xxx	3.2
Other title XIX age 21-64	3.6	xxx	3.6

More than half (56 percent) of the recipients for whom vendor payments were made were members of families with dependent children. Children under 21 in families and other title XIX recipients under 21 accounted for 37.8 percent of recipients. Recipients eligible on the basis of age 65 and over accounted for 22.9 percent of the caseload. Recipients who also received money payments outnumbered nonmoney payment recipients by more than 3 to 1. Among members of families with dependent children under 21, nine out of ten medicaid recipients also received AFDC money payments.

Medical Payments by Groups of Persons Served

As shown below, the distribution of payments differs significantly from the caseload distribution. Payments for persons not receiving maintenance assistance are nearly equal to those for money payment recipients. The single largest proportion of payments (25.6 percent) are made on behalf of recipients aged 65 and older who are not also recipients of maintenance assistance. Such recipients represent only 8.3 percent of the caseload. Payments for these recipients, to a large extent, are made to medical inpatient facilities, which represent the more expensive types of medical services. Only 19.4 percent (slightly more than half of the corresponding recipient proportion) of payments are made on behalf of children under 21 years of age. Among the eligibility groups under age 65, the largest proportion of payments (23.9 percent) are made on behalf of the permanently and totally disabled.

		Money Payment Status	
Basis of eligibility	Percent	Money payment authorized	Money payment not authorized
Total	100.0	54.4	45.6
Age 65 and over	36.6	11.0	25.6
Blindness	0.6	0.4	0.2
Permanently and totally disabled	23.9	14.9	9.0
Children under 21 in families	16.5	13.9	2.7
Adults in families with dependent children	16.1	14.3	1.8
Other title XIX under 21	2.9	xxx	2.9
Other title age 21-64	3.4	xxx	3.4

Payments by Type of Service

Sixty-nine percent of medical vendor payments were made for inpatient services: hospitals (33.4 percent), skilled nursing facilities (19.0 percent) and intermediate care facilities (16.7 percent). Payments for prescribed drugs continued to show a decrease from the previous two months. A similar leveling off in prescribed drug payments in the final quarter of the fiscal year was observed in 1973, although fiscal year 1974 was an exception. Such patterns are a function of the claims payment or fiscal mechanisms in the States and are not indicative of long-term trends. Payments to inpatient facilities showed an average monthly increase for the year ending in May of 1.4 percent over the twelve month period ending in April, in contrast to a one percent increase in payments for outpatient and practitioners' services. Among services, other than inpatient, physicians' services and prescribed drugs account for the largest proportions of payments, representing 10 and 6.2 percent of the total, respectively.

Screening Services

Forty-nine States reported 146,067 children screened under the Early and Periodic Screening, Diagnosis and Treatment Program. Fifty-three percent of the children screened were six years of age and older. Forty-eight percent of children screened had referrable conditions uncovered and ninety-three percent of those with conditions uncovered were referred for diagnosis and/or treatment.

1/ Includes recipient estimates for Colorado, Maryland, and Wyoming which were based on average payments per recipient from prior months, with an inflation factor for Colorado.

ANNOTATIONS

1. The following definitions apply to the symbols appearing in the detailed tables:

   --- indicates no data reported.
   *** indicates that the percent was not computed because the base was too small.
   Z indicates that the percent was less than 0.05.

2. Arizona has no title XIX program and is excluded from the tabulations.

3. Colorado, Maryland, and Wyoming did not report recipients or payments by maintenance assistance status and basis of eligibility of recipient and are excluded from all applicable tables. Montana reported recipients and payments by basis of eligibility only.

4. States do not always report premium or per capita payments into the SSA system for the aged and disabled recipients separately, as in Georgia, Maine, Vermont, West Virginia, and New York where the payments reported under the aged category include payments for the disabled. Also for New York, data related to payments into the SSA system for May represent retroactive payments for the period July-September 1974. There is variance from month to month in States reporting HMO premium payments because in some cases, such payments may be made less frequently than monthly.

5. Minnesota and Washington included HMO recipients and premium amounts in the data in Tables 2-14.

6. Recipient data by basis of eligibility and maintenance assistance status were partially estimated by Michigan and North Carolina.

7. In addition to Colorado, Maryland and Wyoming; Massachusetts, Nevada, Pennsylvania, and Utah are excluded from Tables 10-13 because children and adults in families were not reported separately. Connecticut, Illinois, Kansas, Minnesota, and West Virginia were able to report children and adults separately but were unable to differentiate medical vendor payments between adults and children in families. These States are excluded from the total percentage computation in Table 11. Pennsylvania did not differentiate other Title XIX recipients by age and is excluded from Table 14.

8. For Utah, all adult recipient i.e., aged 65 and over, blind and disabled are reported under money payment not authorized even though some may be SSI recipients. North Carolina reported other title XIX recipients under 21 as children who are members of families.

9. In some States, two or more types of medical services may be grouped together under one class, as in Connecticut where other practitioners', clinic, laboratory and radiological, home health, and family planning services are included in other care, and as in South Carolina, where skilled nursing facility services include payments to State mental institutions.

10. For some States, differences in vendor payment amounts between Table 3 and Table 5 are due to inclusion of retroactive cash adjustments which can be reported by type of services (Table 5) but which are not applicable to the recipients reported in Tables 2, 4, and 6-9.

Annotation specific for screening (Tables 15-20)

11. States omitted from tables either did not report on screening services for May 1975 or there were no individuals screened during the month.

12. California reported 79,794 individuals receiving comprehensive physical examinations in addition to the screening data.

13. Screening payments for Idaho, Illinois, New York, Pennsylvania, Texas, and the Virgin Islands are not reported separately by age.

14. Data for Massachusetts, Ohio, and Rhode Island are largely estimated and incomplete.

15. For Rhode Island, data include 113 newborns, for whom payments are reflected in physicians' or hospital services. For Massachusetts, data include services for medicaid newborns, foster children, and mentally retarded children enrolled in States' special schools.

16. Payments for screening services were not reported by the District of Columbia, Florida, Kansas, Maryland, Massachusetts, Michigan, North Dakota, and Puerto Rico.

TABLE 1 TOTAL AMOUNT OF MEDICAL PAYMENTS UNDER TITLE XIX OF THE SOCIAL SECURITY ACT BY FORM OF PAYMENT AND BY HEW REGION AND STATE (MAY, 1975)
